PROFESSIONAL SUMMARY

Motivated Information Technology student at Monash University with hands-on administrative experience and strong technical foundations across multiple programming languages. Proven ability to deliver accurate, professional results in fast-paced environments while maintaining excellent attention to detail. Trilingual communicator (English, Indonesian, Mandarin) with a genuine commitment to customer service and continuous learning.

EDUCATION

Bachelor of Information Technology

Monash University, Clayton

February 2025 – December 2026

Diploma of Information Technology

Monash College

June 2024 – December 2024

PROJECTS

Personal Portfolio Website

- Designed and built a personal portfolio website from scratch to showcase software development projects, skills, and experience to potential employers.
- Implemented a responsive, accessible layout using HTML and CSS, including mobile navigation and semantic structure.

Local Pizzeria Website Redesign

- Redesigned the website for a local pizzeria whose outdated site was struggling to attract customers, rebuilding it with a cleaner layout and clearer menu presentation.
- Delivered a more functional and visually professional experience for visitors using HTML and CSS.

Candle Craft Academy Website

- Worked in a team of 5 people in an agile framework.
- Completed a fully functional website with booking system and account management using PHP.

WORK EXPERIENCE

Administration Intern | Siloam Hospitals

April – May 2024

- Managed front-desk operations, including greeting and directing patients and visitors with professionalism.
- Maintained accurate patient records through data entry, document management, and administrative filing.
- Coordinated staff scheduling, appointment bookings, and internal communications to support daily operations.
- Handled sensitive patient information in strict compliance with confidentiality and privacy protocols.

Key Achievement:

- Recognised by supervisors for reliability and attention to detail; improved existing document organisation systems to increase retrieval efficiency.
